

- Implemented Changes:
- Added created\_at and updated\_at columns to categorical tables.
  - Added a number of indeces (see third column of each table).
  - Added the 'order\_day' variable to the orders table, to enable indexing on timestamp variable.
  - Moved the product price variable to a separate table, to enable better price change tracking.
  - Created a product sales table, to aggregate revenue earned from sales of a given product, on a given day. Only orders maked as 'completed' are counted.
  - Created customer\_sales table, to aggregate revenue earner from a given customer, on a given day. Only orders maked as 'completed' are counted.
